PROJECTS / OPEN-SOURCE

Threads-Clone | Link   *Clerk Auth TypeScript Next.js 13 Tailwind CSS MongoDB*
- A Threads-application clone to learn more about social media development which is similar to Twiiter and Next.js 13.
- Threads is a social media app that allows users to share short, ephemeral messages with their friends.

Promptopia | Link   *Next.js 13 Tailwind CSS Next-Auth MongoDB*
- In this Project, you can help the developers by sharing or posting and also discovering amazing AI search prompts. You can use these prompts for better development.

Airbnb-Clone | Link   *prisma Next.js 13 Tailwind CSS Next-Auth MongoDB*
- Provides a platform for both hosts (property owners) and guests to connect and transact for short-term stays.
- Hosts can list their properties, set their own pricing, and specify house rules and availability.
- Guests can browse listings, read reviews, and book accommodations based on their preferences and budget.

Tasky Application | Link   *HTML, CSS, JavaScript , Bootstrap*
- Build a task management tool for organizing your daily tasks, adding images in an easy and straightforward way.

Notes-App | Link   *React.js, Javascript*
- A note-taking application where you can Create, Edit, and Delete the notes.
- And also search your notes by using search bar.
