EDUCATION

Sinhgad Institute of Technology   Lonavala, Maharshtra
B.E   *2022*

CDAC   Mumbai, Maharashtra
PG Diploma   *2024*

EXPERIENCES

Devtown — Intern   2023
Remote

- Worked on the latest tech stack like MERN Stack to develop amazing projects. I created simple API's consume data from MongoDB Atlas. Familiarity with React.js and other JS Technologies.

PROJECTS

Threads Clone | *Next.js, React ,Tailwind CSS, MongoDB, Node.js JavaScript*   link

- A Threads-clone application is a Full-Stack project to learn more about social media development which is similar to Twitter. Essential features of a Threads clone include user authentication, real-time updates, and user feeds based on who they follow. This application allows users to share short, ephemeral messages with their friends.

iPhone 15 | *Nextjs, React, GSAP, Three.js, Tailwind.css*   link

- Developed a visually stunning website resembling Apples iPhone 15 Pro page using Next.js, React, Three.js, and GSAP. Implemented a responsive design to ensure a seamless user experience across various devices and screen sizes. Optimized website performance, achieving lightning-fast loading times through code optimization and server-side rendering with Next.js. Leveraged GSAP and Three.js to create interactive animations and engaging visual effects, resulting in a high click-through rate and increased user engagement. It attracted a good number of visitors, and performed well, loading in just a few seconds. The click-through rate was quite impressive, showing that people were engaging with the content.

Promptopia | *Next.js , Next-Auth, MongoDB,Tailwind CSS*   link

- In this Project, you can help the developers by sharing or posting and also discovering amazing AI search prompts. You can use those prompts for better development. Learned about the advantages of using Next.js for building web applications, such as server-side rendering (SSR) and static site generation (SSG). Explored techniques to optimize search engine optimization (SEO) and metadata within Next.js applications for better discoverability

Airbnb-Clone | *Prisma, React.js, Next.js, Node.js, Next-Auth, MongoDB*   link

- Provides a platform for both hosts (property owners) and guests to connect and transact for short-term stays. Hosts can list their properties, set their own pricing, and specify house rules and availability. Guests can browse listings, read reviews, and book accommodations based on their preferences and budget.

ACHIEVEMENT

Mahindra BAJA (2020)

- As a member of the Fabrication department, I played a key role in fostering effective communication within my team of 25 passionate members, actively engaging and collaborating to enhance our collective efforts

TECHNICAL SKILLS

Language: Java, Javascript, SQL
Frameworks: React.js, Next.js,Node.js, Express, Springboot, Tailwind css, GSAP animation
Libraries: Three.js, REST api, Redux, BootStrap
Databases: MongoDB, MySQL
